Dr. Schumacher: The wipe specialist in Europe

The idea of highly effective and particularly user-friendly hygiene items and disinfectants has been motivating Dr. Schumacher's products for over 40 years. As a certified OEM and private label manufacturer, we have extensive expertise and attach particular importance to long-term and reliable customer relationships. We offer a broad portfolio of white label products and support our customers individually in all development processes – from the idea to delivery.

With a daily production volume of up to 3,000 pallets of finished products, Dr. Schumacher is the largest producer of wet wipes in the EU.

We have our own state-of-the-art production facilities available for this purpose. Each day, our employees at

seven locations worldwide ensure that our customers are reliably supplied with highly effective solutions. In addition to hygiene and cosmetic products and disinfectant wipes, Dr. Schumacher also produces, for example, wet wipes and baby wipes for its trading partners, as well as floor cleaning and all purpose wipes, which are available in numerous

drugstores and markets worldwide. Only high-quality, high-performance materials are used. Some of the non-woven used are made from 100 % renewable raw materials. We use recycled material and work on the basis of the latest technological findings and state-of-the-art production processes.

Innovative wipe solutions Customised and flexible

Babies' skin has high standards – and so do we

Care wipes for all phases of development

Babies and growing children have different needs throughout their stages of development. In line with this, we offer a variety of care wipes.

These range from baby care wipes for gentle and effective cleaning during daily nappy changes, to moist cleaning wipes for the face and hands, to innovative self-foaming wash mitten for growing children. Our wide selection of non-woven with different fibre compositions and high-quality impregnating

liquids, are regularly developed further and tested by our experts. We offer various non-woven that are all equally high-performance: non-woven made from renewable raw materials that clean efficiently, or PET non-woven that are particularly durable. Our formulas are dermatologically tested for their compatibility with skin.

BABY CARE PRODUCT PORTFOLIO

- Wet baby care wipes
- Dry nappy pads
- Children's toilet paper
- Wet and dry washing wipes
- Self-foaming wash mitten
- And much more

PRODUCT ADVANTAGES

- Supports a daily routine
- Customised variants
- Diverse formulations
- Delicate cleansing
- Gentle nourishment
- Easy disposal

Freshness and protection for every day

Special formulations for daily care needs

The demands placed on cosmetic products are high. They need to gently cleanse, sustainably nourish, revitalise or soothe skin – and also be tolerated by it. Additionally, the various skin types need to be taken into account in order to achieve an optimal care result. We tailor the selection of our non-woven and impregnation solutions to the needs of different skin types.

That is why our product range includes, for example, facial cleansing wipes for combination, dry or sensitive skin, or wipes with special impregnation solutions for problem skin, such as acne or neurodermatitis. Our eye makeup removal pads, which remove even waterproof eye makeup easily and effectively, are also enjoying increasing demand. Nail polish removal pads and wipes

are also very popular. Impregnated so as to be ready for use, they allow nail polish to be removed quickly and reliably.

Our highly effective and innovative textile masks made of non-woven are on trend, as they enable quick and easy application of the active ingredient combinations. Thanks to the impregnated non-woven, the active ingredients are evenly distributed on the skin. The so-called occlusion effect ensures a higher concentration of active ingredients on the skin than with conventional masks. The skin compatibility of all our formulations is dermatologically tested and confirmed. Additionally impregnation solutions are available that are recommended by Öko-Test and Stiftung Warentest and certified by NATURE. Furthermore, we can also provide expert ophthalmological evaluations for our products.

Individual care for the highest demands

Gentle care for sensitive skin

Personal hygiene is an integral part of a person's daily routine, especially for general well-being. As optimal everyday companions for at home and on the go, our diverse range of products facilitates daily skin care and ensures a pleasant feeling on the skin.

Our formulas are specially tailored to the different regions of the body and are, of course, dermatologically tested. The intimate region is a sensitive area when it comes to care.

For comprehensive hygiene, we offer impregnation solutions with pH values that are specially adapted to this intimate area, skin-friendly surfactants from plant based materials, and extra sensitive preservation. Our diverse product portfolio is also supplemented by wet washing wipes and mitten as well as disposable face cloths.

Cleaning wipes for all areas of application

Cleanliness and shine in no time

Whether between other tasks or on the go – our ready-to-use cleaning wipes enable quick and easy cleaning without much effort.

Our product portfolio offers numerous ranges for different areas of application: from material-friendly cleaning wipes for highly sensitive screens, displays and touchscreens to classic all-purpose and spectacle wipes or glass and window cleaning wipes to cleaning wipes for kitchens, bathrooms, floor coverings, furniture, leather goods or car care. We even have cleaning wipes and mittens for pet care in our range.

Additionally we are able to give each wipe special fragrances or properties – whether they need to give a streak-free shine, be antistatic, highly grease-dissolving, or limescale- or dust-repellent. We are also able to respond to the diverse wishes and needs of our customers with our packaging. We are thus able to guarantee and offer various product properties for our packaging.

Our ready-to-use wet wipes are not only available in the well-known flowpack, but also in dispenser boxes or as mini flowpacks in shelf-compatible display boxes.

HOUSEHOLD PRODUCT PORTFOLIO

- All-purpose wipes for kitchens, bathrooms and living areas
- Floor care wipes
- Stainless steel care wipes
- Furniture care wipes
- And much more

PRODUCT ADVANTAGES

- Economical and versatile
- Ready to use and uncomplicated
- Customised variants
- Different fragrances available
- Thorough cleaning
- Suitable for different surfaces

Safe protection against pathogens

Everyday essentials in convenient package sizes

Bacteria, viruses and fungi: if not before, then, at any rate, when the annual flu season comes round, we become aware of the importance of disinfection and hygiene to prevent infections. Thanks to our many years of experience as a manufacturer for the medical sector, we have products that meet the highest of standards in these areas. In an increasingly mobile society, the demand for products that protect against germs safely and effectively is increasing. You can take advantage of this trend to

stock your shelves with user-friendly products that offer safe protection against diseases. Thanks to our in-depth knowledge of the European Biocidal Products Regulation, which came into force in 2013, and its effects on the marketing of products, as well as our large number of compliant formulations, we are able to offer our customers a binding declaration for our wet wipes of their antibacterial and disinfectant effect.

DISINFECTION PRODUCT PORTFOLIO

- Disinfecting hand gel
- Disinfectant spray and wipes for hands and surfaces
- Disinfecting washing foam
- Foot disinfectant spray and wipes
- Mobile phone and tablet cleaning wipes
- And much more

PRODUCT ADVANTAGES

- Highly effective products
- Increases protection against germs
- Quick-acting with thorough effect
- Works in accordance with applicable standards
- Particularly user-friendly
- Ideal for on the go

Innovative and diverse:

Dr. Schumacher offers bespoke product solutions

On top of customised and versatile wipe products, Dr. Schumacher's product portfolio extends to a very wide variety of dosage forms. The development of our product portfolio is based on close collaboration with our customers, adapted to their different industries and uses. This makes Dr. Schumacher your reliable partner for tailor-made solutions.

Alongside various wipe products, we also produce gels, creams, masks and pads in different variants. Our liquid products for personal hygiene and disinfection are available in various fillings and container sizes. In line with your requirements and wishes, we jointly develop a product idea right up to the finished product on the shelf.

This way, we support the individual development of your stores. We help you cater to the broad spectrum of needs your customers have. The variety of product options from Dr. Schumacher and its broad portfolio support you in addressing your target group efficiently. Take advantage of the expertise of our product specialists.

The largest Dr. Schumacher site in Poland: A family business on a growth course

At our site in Lubań, Poland – the largest wet wipe factory in the EU – more than 1,000 employees work daily to produce and develop highly effective and user-friendly products.

Dr. Schumacher produces dry and impregnated wipes and wipe systems in Lubań across 60 different production lines and 60,000 m² of floor space.

The main production facility for wet and dry wipes and wipe systems is located in this branch, which was founded in 2002. A team there made up of a good 60 people is responsible for our customised machine and plant engineering, aligned with customer wishes, for the production of tailor-made solutions.

With this state-of-the-art and adaptable production centre, Dr. Schumacher sets new standards in production.

With a floor space of over 60,000 m², it is Dr. Schumacher's largest production facility. Up to 500 million packs of dry and wet wipes and pads and masks can be produced annually on more than 60 different production lines. In addition, creams and liquid products are also produced for the areas of disinfection, cleaning and skin care. The provision of machine capacities at short notice and adaptations to individual product requirements are easily achieved.

With this state-of-the-art company site, Dr. Schumacher sets new standards when it comes to efficiency, quality and innovation. We thus significantly support an efficient supply of highly effective quality products and ensure the critical delivery capacity.

Facts and figures: Dr. Schumacher at a glance

People and their health have been at the centre of our daily work since the founding of our family business in 1978. In addition to producing a wide range of disinfection and hygiene solutions, our years of expertise extend to the development of impregnating liquids and the in-house production of ready-to-use wipes.

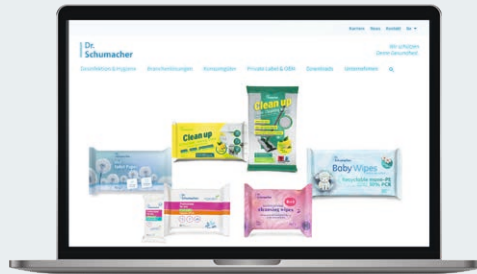

Large variety of products, particularly high capacities

As Europe's leading manufacturer, Dr. Schumacher produces highly effective disinfection, hygiene, cosmetics and personal care products.

In addition to large drugstore chains, discounters and retail chains, our customers include many well-known and prestigious international brand manufacturers.

Our products are sold in more than 70 countries worldwide. More than 1,600 employees at seven locations around the world make a considerable contribution to this every day with their commitment and expertise. With an annual turnover of over 200 million euros and a daily production volume of up to 3,000 pallets, Dr. Schumacher is the largest manufacturer of wet wipes in Europe and one of the leading product developers in this field. To achieve this, around 80,000 tonnes of mixed lotion are produced annually, resulting in many millions of product solutions.

With its work and constant further development of its products, Dr. Schumacher is committed to reliable and safe hygiene. As a private label manufacturer, we thus not only promote health protection, but also support our customers in developing successful private labels.
